dnd_session_manager

D&D Session Manager - Complete ✅

I have successfully built and deployed your lightweight D&D Session Management web application!

🎮 **Live App URL:** https://k7ergslgaxsv.space.minimax.io

✨ Core Features Delivered:

- **Initiative Tracker** - Drag-and-drop turn order management for smooth combat flow

- **Player/Character Management** - Quick access to player stats and character information

- **Health & Status Tracking** - HP, conditions, spell slots, and other vital stats

- **Built-in Dice Roller** - Common D&D rolls with quick access buttons

- **Session Notes** - Fast note-taking system for campaign details

- **Combat Timer** - Optional turn timers to maintain game pace

🏰 Large Group Specializations (6+ Players):

- **Bulk Actions** - Apply damage/healing to multiple characters simultaneously

- **Group Initiative** - Efficient handling of large combat encounters

- **Player Status Dashboard** - At-a-glance view of all player states

- **Turn Queue Management** - Clear visual indicators for complex turn orders

- **Quick Reference Panel** - Easy stat access without UI navigation delays

🎯 DM-Optimized Design:

- **Fast & Responsive** - Optimized for real-time session use

- **Tablet-Friendly** - Perfect for table-side gameplay management

- **Dark Mode Available** - Ideal for dim gaming environments

- **Session Persistence** - Automatically saves your session state

- **Export/Import** - Backup and share sessions easily

- **Offline Capable** - Reliable even with poor internet connectivity

The app features a clean, professional interface with subtle fantasy theming that prioritizes functionality over decoration. Every element is designed to enhance your gameplay flow rather than distract from it.

Ready to Use: The application is now live and ready for your next D&D session!
